DIGITAL UP SKILL FOR EMPLOYMENT OPPORTUNITIES

Digital Upskilling acts as a gateway,
breaking down barriers to entry by
enhancing digital literacy.

KEY FOCUS AREAS

- Identify the individuals who need upskilling, with a major focus on fresh graduate youths, unemployed individuals and employed individuals who need to venture in IT careers.
- Onboard the selected participants to the program
- Program intervention (3 to 6 months)
- Certification.
- Career alignment (assist them in building solid resumes and career portfolios)
- Success stories.

- To ensure that the trainees apply existing knowledge to generate new ideas, products, or processes in digital representation.
- To be able to engage in the modern digital trends and be able to align in their career areas of focus.
- To enable trainees use critical thinking skills to plan and conduct research, manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.
- To bridge the digital divide especially amongst the African youths.
- To enhance internet safety and online security.
